

II.- 6. Japanese Red Cross radiation emergency hospitals and related hospitals

Major NPP/nuclear facilities and JRC hospitals related to radiation emergency medicine

- Major NPP and nuclear facilities
- JRC hospitals designated as radiation emergency hospitals
- Related JRC hospitals

The Japanese radiation emergency medicine system designates nine JRC hospitals as radiation emergency hospitals (eight primary radiation emergency hospitals and three secondary radiation emergency hospitals).

These eleven JRC hospitals, the JRC atomic-bomb survivors hospitals in Hiroshima and Nagasaki and Fukushima Red Cross Hospital who responded to the nuclear disaster caused by the Fukushima Daiichi accident are collaborating with each other to enhance JRC's nuclear disaster preparedness.

JRC Secondary radiation emergency hospitals
Nagahama RC Hospital
Matsuyama RC Hospital
JRC Karatsu Hospital
JRC Primary radiation emergency hospitals
Date RC Hospital
JRC Ishinomaki Hospital
JRC Mito Hospital
JRC Fukui Hospital
JRC Otsu Hospital
Maizuru RC Hospital
Tottori RC Hospital
Matsue RC Hospital
Related JRC hospitals
JRC Fukushima Hospital
Hiroshima Red Cross Hospital & Atomic-bomb Survivors Hospital
Japanese Red Cross Nagasaki Genbaku Hospital
